- 1** Access control for large collections 85%
 H. M. Gladney
ACM Transactions on Information Systems (TOIS) April 1997
 Volume 15 Issue 2
 Efforts to place vast information resources at the fingertips of each individual in large user populations must be balanced by commensurate attention to information protection. For distributed systems with less-structured tasks, more-diversified information, and a heterogeneous user set, the computing system must administer enterprise-chosen access control policies. One kind of resource is a digital library that emulates massive collections of paper and other physical media for clerical, en ...
